- Direct Provider Contracting
- Access to MediVI Analytics
- Patient Advocacy
- Access to Transplant & Specialty Network

- Broker and Consultant Support
- No Exclusivity Requirements
- Dispute Resolution
- Physician Network Replacement
- With or Without Pre-Certification

6 Degrees Health understands that no one size fits all when it comes to RBP. Our in house proprietary software, MediVI, provides an indepth view of a market, which allows us to provide objective and transparent consultation of the plan's local provider mix. We have a patient advocacy team that can either be the front-line contact for a member or can operate in the shadow of a third party member advocate program.

Our cost containment efforts utilize our proprietary **MediVI** platform, which supports our evidence-based approach by utilizing multiple benchmarks and industry recognized data. MediVI provides valuable medical reimbursement analytics for audits, contracting, claim negotiation, and reference-based pricing.

## Vendor Cost Modeling

We developed our analytic, vendor cost comparison tool, to assist the consultant and plan in their decision making process. Our tool allows the consultant to compare the cost of a PPO, ASO and several different types of reference based pricing options, side by side.

6 Degrees Health focuses on providing transparent solutions, backed by objective data, at a reasonable fee. Our team of seasoned negotiators brings over 40 years of experience in COE network and direct provider contracting. This expertise compliments the RBP solution to enhance access options for the members. Experience provides us with a strong understanding and appreciation of the obstacles facing an RBP plan and how to mitigate them.
