

# Out-of-Network Solution

Don't let your client find themselves unprotected when a large OON claim occurs

## Out-of-network solutions driven by technology & experience

Our out-of-network solution far outperforms traditional out-of-network vendors. Using our RBP experience, we don't start with billed charges; we use bottom-up pricing.

This is an excellent step for a plan that is not quite ready for a full network replacement. This allows your client to experience the savings from a network replacement without fully implementing RBP. Our RBP solutions on non-network claims have resulted in proven savings with nearly zero member disruption.

## Is Your Current Out-of-Network Solution Working?
