

Payment Integrity

Comprehensive Cost Containment

6 Degrees Health provides detailed clinical reviews that evaluates every line item billed, to check for errors and inconsistencies. Our reviews are conducted by industry leading clinical experts, offering the highest quality solution with the best savings.

Superior Payment Integrity Solution

We take a service-first approach to our clinical reviews to ensure accuracy and fairness in billing. Our unique pre-payment “clean claim” review process extends beyond typical clinical reviews and evaluates every line item to identify and remove billing errors and inconsistencies. Our clinical experts conduct the reviews using MediVI, our proprietary data technology, to support negotiations for fair reimbursement rates and confirm that only accurately billed charges are paid prior to any other discount application. Our customer-centric focus, extensive cost containment experience, clinical expertise, and evidence-based data delivers the superior service and optimal savings.

Why Are Clean Claim Reviews Important?

The error rate per claim is greater than 10% and 100% of inpatient claims have billing errors - making claim reviews paramount.

Our clinical reviews are completed by an RN to ensure DRG validation, pharmacy charges, coding, and implants are correct. The detailed review by a clinical expert removes erroneous line items billed, applies network discounts, and verifies billing accuracy. The clean claim review process eliminates balanced bills and can reduce stop-loss premiums. 6 Degrees Health further supports plans by handling all disputes and appeals with the provider.

What Claims are Applicable for Review?

Unpaid or partially paid claims, in network or out-of-network claims, billed charges greater than \$100,000 or which exceed an outlier threshold can all be reviewed.
