6 Degrees Health Attains New Security Certification, Ensuring Highest Protection of Customer Data

For Immediate Release

December 6, 2023

PORTLAND, OR — 6 Degrees Health announced today the company has achieved Service Organization Control Type II (SOC 2, Type II) compliance certification. The SOC 2, Type II report is a comprehensive evaluation of how an organization manages data issued by the American Institute of Certified Public Accountants (AICPA) and is the highest security and data protection rating available.

To obtain certification, a rigorous audit was conducted by an independent auditor licensed by the AICPA. The audit examined the design of internal controls and the operating effectiveness of data security systems to verify adherence to the high standards of SOC 2, Type II.

"This prestigious certification marks a significant milestone in our ongoing commitment to ensuring the security and confidentiality of company and client data," said Kavita Reddy, Senior Vice President of Technology.

6 Degrees Health is committed to delivering best-in-class service. With SOC 2, Type II certification, 6 Degrees Health provides its customers with the assurance that their data is being handled with the utmost care and professionalism.

6 Degrees Health is a leading provider of healthcare cost containment solutions for employer groups, TPAs, and health plans with services including:

› Reference-based pricing solutions that replace traditional network-based employer health plans, resulting in average cost savings between 20-40%.

› Out-of-Network solutions that significantly reduce expenses.

› Payment accuracy solutions that eliminate and/or reduce error-prone billing, ensuring our clients pay the correct amount.

About 6 Degrees Health

6 Degrees Health is an innovative, service-first healthcare cost containment company. We set healthcare free from the constraints of traditional networks and bring integrity to historically opaque billing practices. We leverage unparalleled clinical expertise and our purpose-built technology platform to determine fair reimbursements and payment accuracy.
